

Daily Acts Organization

every action makes a ripple

Grounded in the core belief that every choice you make matters, Daily Acts takes a heart-centered approach to fulfill our mission of catalyzing transformative action that creates more connected, equitable and climate-resilient communities.

Spread Solutions & Models

In 2019, we educated 5,637 people and leaders at 109 events, including installing 4 demonstration gardens for Coffey Park Fire Survivors. In fact, 43% of the over 500 rebuild landscape plans submitted were based off templates we created with Sonoma Water and local partners!

Strengthen Community Leadership

Because change happens through mindful collaboration, we invest in growing and connecting leaders through our Environmental Health Network, Leadership Institute for Just and Resilient Communities program, and our engagement with over a dozen local, regional and state coalitions and networks.

Build Public Will & Civic Engagement

To rise up to the need for climate action, Daily Acts co-founded Climate Action Petaluma resulting in the City of Petaluma passing a Climate Emergency Resolution and establishing the first appointed Climate Action and Policy Commission in Sonoma County.

Since 2002, Daily Acts has educated over 63,000 people at 1,338 talks, tours, and volunteer events to grow food, habitat, medicine and connection while saving millions of gallons of water annually. Together, we have installed 33 demonstration gardens and mobilized 81,396 resilience building actions locally, regionally and nationally.
