

Thank you for 20 years!

Happy Anniversary Daily Actors!

What a long, inspiring trip it's been.

Whether you've been with us a month, or since Daily Acts was just a few volunteers and a stack of Ripples Journals, we invite you to pause and celebrate the small steps that have led to big change.

20 years ago, the sudden loss of my mom and tragedy of 9/11 acted as a catalyst to do something about a people and planet in crisis. Out of this, **Daily Acts was founded on the belief that by reclaiming the power of our daily actions, we could transform ourselves, our homes, gardens, neighborhoods, communities and beyond.**

In a dark and stormy world of large problems, what if the power of small could change it all? It's small acts of courage and conviction, small groups of committed world-changers, and even small gardens of regenerative delight.

This is how we've gone from planting one garden to mobilizing hundreds, to tens of thousands of resilience-building actions. **With you at our side, Daily Acts has grown from educational events to installing gardens, fostering coalitions, training leaders and helping our community become national leaders in responding to the climate emergency.** In response to drought, fire, flood, pandemic and the climate crisis, together we rise.

There has never been a time when our small efforts and groups have mattered more. Now, it's time to get Daily Acts' solutions and models in many more hearts, hands and communities. Thank you for your vital support!

Take heart, take part, take action,

Trathen Heckman

Daily Acts Founder and Executive Director

Your support amplifies our impact.

SPREADING SOLUTIONS & MODELS: Create inexpensive, simple-to-implement solutions that empower people to take climate action and improve the environment while providing models that are accessible and replicable beyond our local community.

STRENGTHENING COMMUNITY LEADERSHIP: Develop tomorrow's environmental champions that understand that change occurs at the intersection of environment, economy, and equity.

BUILDING PUBLIC WILL & CIVIC ENGAGEMENT: Grow support for science-aligned climate policy and adoption of low-tech solutions on local, state, and national scales by working with our networks and alliances.

1,474 Programs over 20 years

Talks, tours, hands-on workshops, & community gatherings to inspire change:

ACTION: Growing skills, relationships, and resilience drives bigger community changes. We've installed **37 demonstration gardens**, educated and engaged over **70,000 people** and mobilized over **100,000 actions** and projects to grow food, save resources, reduce climate change, and build local self-reliance.

LEADERSHIP: To build community leadership, Daily Acts has helped launch and lead over **2 dozen diverse coalitions** at the local, regional, state and national scale in addition to adopting and strengthening the Leadership Institute and ECO2school youth climate leadership programs.

COMMUNITY TRANSFORMATION: By pairing community driven action and leadership development with local governmental partners, we design innovative programs and policies to address the climate emergency. We work with over **100 organizations and businesses** each year to host programs and collaborate with regional networks.
